

# AUTOMATIC TOKEN DISPENSER

## Model – ATD-2

Automatic Token Dispenser is a self service thermal paper token dispenser with date and time of issue for Queue Management, Access Control, Visitor Entry and Exit Management and many other applications.

## Features:

- Automatic Token Dispenser is used for Queue Management, Access Control, Visitor Entry and Exit Management applications.
- The Model: ATD-2 is configured with a 2 Inch Thermal Printer with Auto-cutter to print out the paper tokens. It is cut automatically and dispensed to the user.
- The printed out paper token contains the address of the organization along with date, time and serial number of the token.
- The paper token print out format is user configurable in the machine as required.
- Date and time stamp are important for the visitor management function.
- The Model: ATD-2 is configured with an LCD for user interface. The LCD displays the current date and time.
- The user presses the push button switch once to get one token printed out.
- The token number is reset to starting point (Token Number 1) automatically upon date and time changes are detected as per real time clock.
- A manual reset button is also configured inside the machine for resetting the token number.
- 10 meters – 2 inch paper roll is used in the machine that can print about 200 tokens of 5cm in length.
- Automatic Token Dispenser is very user friendly and easy to operate and maintain.
- Dimensions: 300 mm (H) X 260 mm(W) X 225 mm(D) – 8 Kgs
- Mains Power Supply: 230V, 50HZ operation, 15W (Max)
