

## Automatic QR Coin Vending Machine

Scan to View Video

### Model: - ACVM - 3QR

Coin vending machine finds application in dispensing small value coin change to users against receipt of payment based on QR Code UPI application in a cashless manner.

Touch screen PC based machine is easy to use and operate.

QR Coin Vending Machine is configurable to dispense two or three denominations of coins upon receipt of UPI payment credit.

The user selects the denominations of coins required on the touch screen. QR Code is generated dynamically for the coin value selected. Once the payment is made by the user, the machine displays the credit received and dispenses the selected denominations of the coins.

# Automatic Coin Vending Machine with touch screen PC and QR payment
