

## Automatic Ticket Vending Machine

Automatic Ticket Vending Machine is a Self-Service Touch Screen PC based Kiosk configured with a thermal printer to Print and issue tickets for various applications such as entry tickets, Food tickets/coupons, parking tickets and other pre-paid tickets. Cashless UPI QR Code payment is integrated for easy operation.

The user walks-in and selects the required tickets on the touch screen. After confirmation, the screen displays the QR code for making the payment. Once payment is successful, ticket is printed out immediately.

Easy to use machine with great flexibility for configuring tickets and getting Sales reports.
